#### Long-running fractures study doubles as a bountiful women's health data source

Rosalyn Correa-De-Araujo, Senior Scientific Advisor to the Director, Division of Geriatrics and Clinical Gerontology

(DGCG)

More than one third of older adults fall each year. The risk of falling and fall-related problems like fractures and loss of mobility rises with age and is affected by other health conditions and some medications. A rich collection of data and samples from the Study of Osteoporotic Fractures (SOF), one of the most influential and long-running studies of its kind, is now available from NIA's AgingResearchBiobank, offering decades of women's health data that goes far beyond broken bones. ### CONGRATULATIONS!

#### Congratulations Joan Ilardo, Ph.D. and Angie Zell, MPH on New Grant!!!

The Michigan State University team has been awarded a grant from the Michigan Health Endowment Fund for the project, **Successful Nutrition Programs Across the Lifespan: A Roadmap**. The project focuses on jump-starting effective collaborations among community organizations to improve food security and equity for all of their residents. This initiative will address malnutrition, equity, and food insecurity across the lifespan through a process that optimizes communities' collaborative organizational skills. Dr. Ilardo is PI and Ms. Zell is Project Coordinator. They will create a collaboration toolkit for addressing food security with two coalitions; in the Capital Area and in Northwest Michigan. The \$499,645 grant is for a two-year project.

### JOBS

#### Dr. Neha Gothe (2014 MCUAAAR Scientist) Seeking Visiting Project Coordinator

The Department of Kinesiology and Community Health (KCH) in the College of Applied Health Sciences (AHS) seeks a full-time (12-month) Visiting Project Coordinator. This position will coordinate research project activities funded by the National Institute on Aging for the Exercise Psychology Lab. Primarily the project coordinator will oversee the day to day operations of an exercise-based clinical trial for middle aged and older adults under the supervision of the Principal Investigator: Dr. Neha P. Gothe. More details about the project can be found at: <https://clinicaltrials.gov/ct2/show/NCT04323163>.
