One-Year Pilot Project Grants to Address the Impact of Multiple Chronic Conditions (MCCs) in Older Adults: The HCSRN-OAICs AGING Initiative

Deadline: November 12, 2021

The goal of the AGING Initiative is to bridge the Health Care Systems Research Network (HCSRN) with the Claude D. Pepper Older Americans Independence Centers (OAIC) to create a national resource to nurture and advance an interdisciplinary research agenda focused on older adults with multiple chronic conditions (MCCs). We are seeking one-year pilot project proposals to support activities that will increase the likelihood of successful future research proposals focused on older adults with MCCs. This one-year project will have a maximum of \$40,000 budget (total costs). Up to 3 grants will be awarded in this cycle.

LOI Submission Due Date: 11/12/2021

Invitations Sent for Full Applications: 12/17/2021

Full Applications Due (by invitation only) 02/25/2022

ANNOUNCEMENTS

Register for the Fall 2021 NIH Virtual Seminar on Program Funding and Grants Administration!

Monday, November 1 – Thursday, November 4

Are you ready to learn more about the NIH grants process while connecting with NIH/HHS staff and collecting resources to share with your team? This fall, the NIH is bringing back the NIH Virtual Seminar on Program Funding and Grants Administration directly to your computer...FREE of charge!

This event is designed to demystify the NIH grant application, review, award and post-award processes and policies! [Register today](#) and be sure to check out all the networking opportunities taking place during the seminar, including new ways to chat one on one with NIH and HHS experts, interact with attendees, and make the most of the seminar.

If you're new to working with the NIH grants process as an investigator or administrator, join us as we connect and collaborate! Here's what to expect:

- [Four-day event](#) with live sessions, as well as an on-demand video library
- [Three concurrent sessions](#) designed around grants policies and programs, including case studies
- [Live chat opportunities](#) with NIH and HHS experts on the grants process, policies, and programs
- [Downloadable resources from over 45 booths](#) to reuse and/or share with others at your institution

Keep tabs on the latest registration and agenda updates on the [seminar website](https://nihvirtalseminar2021.vfairs.com/) (<https://nihvirtalseminar2021.vfairs.com/>)

EVENTS

Emotional Sensibility: Exploring the Methodological and Ethical Implications of Research Participants' Emotions

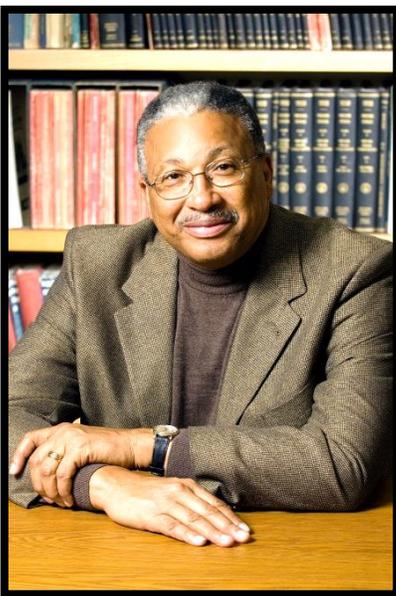

Dr. Wendy Pearlman (Northwestern University)

Wednesday, October 27, Noon to 1:00 pm

Building upon the term “ethnographic sensibility,” this article makes the case for an “emotional sensibility” that seeks to glean the emotional experiences of the people whom we study and who participate in our research. I

argue that an emotional sensibility is relevant for any human subjects research, including interviews, surveys, and experiments, even when emotions are not a direct variable under study. Methodologically, attention to research participants' emotions can improve research because these emotions are themselves data, influence the validity of other data, and affect our ability to collect data in the future. Ethically, it balances ethics committees' rationalist emphasis on elements such as information and cognitive capacity with appreciation for how emotions infuse consent, vulnerability, and experiences of risk and benefit. Against the tendency to narrow concern about participants' emotions to a medicalized notion of retraumatization, an emotional sensibility encourages deeper thinking about research participants' emotional experiences beyond harm and about emotional harms that do not qualify as trauma. Upon presenting these and other claims about how an emotional sensibility can make political science research more empirically valid and ethically sound, the article outlines strategies for cultivating and upholding an emotional sensibility in practice.

A Virtual Toast and Tribute to the Lives and Legacies of James E. Blackwell and James S. Jackson
Sponsored by the 2021 ASA Program Committee and the Association of Black Sociologists

Friday, November 12, 2021, 7:00-9:00 P.M. EST

We invite you to join the 2021 ASA Program Committee and the Association of Black Sociologists in a virtual event honoring the lives and legacies of James E. Blackwell and James S. Jackson, scholars who made monumental contributions to social science research, public policy, and the training and mentoring of hundreds of academics, especially people of color. The program will include two panels, one devoted to the legacy of each scholar. Attendees will also have an opportunity to share their memories and offer other reflections and personal tributes. During this event, we hope to show images of Dr. Blackwell and Dr. Jackson giving lectures, attending conferences, teaching students, and engaging with colleagues. If you have any photos or memorabilia (including programs that contain his name), we invite you to share them with us by sending them to Tod Hamilton todh@princeton.edu.

Event Organizers:

Aldon Morris, ASA Immediate Past President, Leon Forrest Professor of Sociology and African American Studies, Northwestern University

Mignon Moore, ASA Vice-President Elect, Professor of Sociology, Barnard College and Columbia University

Tod Hamilton, Associate Professor of Sociology, Princeton University

Training Medical Residents to Address Social Determinants of Health for Better Health Outcomes

Research Forum – Hosted by the Department of Medicine Office for Research

Michigan State University

Wednesday, November 3, 2021, Noon – 1:00pm EST

Join us for this important Research Forum! Dr. Ilardo will describe process used by medical residents to screen for social determinants of health that can affect successful management of a patient's chronic conditions, identify how infusing training into the Internal Medicine residency curriculum can influence clinical practice, and review results of the pilot implementation of the Action Planning Guide checklist.

CONGRATULATIONS!

Congratulations Dr. Lee (2021 MCUAAAR Scientist) on Best Paper Award!!!

Hee Rin Lee, PhD and her research team received the Best Paper Award at the 24th ACM Conference on Computer-Supported Cooperative Work and Social Computing. This is a flagship conference in the field of HCI. Awards and recognitions for CSCW are based on nominations by all CSCW reviewers, and chosen by a separate Awards Committee. The awards evaluation process is blinded, and committee members score papers based on both their own evaluation and the evaluations of the original reviewers, including reasons given for nominations. Best Paper Awards represent 1% of all submitted papers.

Here is the info about the paper:

“Every Cloud Has a Silver Lining: Exploring Experiential Knowledge and Assets of Family Caregivers”

Ji Youn Shin, Michigan State University; Dima Chaar, University of Michigan; Catherine Elizabeth Davis, Michigan State University; Sung Won Choi, University of Michigan; Hee Rin Lee, Michigan State University
